Computer Applications	Course in Analysis & Presentation of Data	To learn the basic & advance concepts of Excel & PowerPoint.

ST. MIRA'S COLLEGE FOR GIRLS, PUNE
SYBBA COURSE DESCRIPTION

SYBBA SEM III			
Category	SEM III	Title of the Course	Course Description
Major 1 Subject [4Credits]	Human Resources Management	Organizational Behavior	Organizational Behavior explores the dynamics of human behavior within the workplace, focusing on individual, group, and organizational levels to enhance understanding and effectiveness in managing people and organizations.
	Financial Management	Management Accounting	Students will understand role and importance of management Accounting in Business.
Major 2 Subject [4Credits]	Human Resources Management	Legal Aspects and Industrial Relations in Human Resource management	It covers employment laws, discrimination, wages, working conditions, termination, and employee rights. Students learn to ensure legal compliance, mitigate risks, and promote fair workplace practices, including contracts, labor laws, anti-discrimination legislation, and dispute resolution.
	Financial Management	Principles of Finance	Students will learn financial analysis, budgeting, risk management, and capital budgeting. Students gain skills in evaluating financial decisions, understanding financial markets, and optimizing resources to enhance organizational value and sustainability.
VSC Major Specific [2Credits]	Human Resources Management	Entrepreneurial Process	The curriculum delves into ideation, opportunity recognition, and venture creation strategies, equipping students with the skills to innovate, validate business models, and navigate startup challenges. Through hands-on projects and real-world case studies, students learn to develop and execute entrepreneurial initiatives.
	Financial Management	Business Analytics	The students will learn to improve business performance by identifying areas of the business that can be optimized.
FP-Major Specific [2Credits]	Human Resources Management	Field Project in Human Resource Management	Students will be equipped to apply theoretical knowledge to real-world organizational challenges, fostering critical analysis and innovative solutions in areas such as leadership development, change management and employee engagement.
	Financial Management	Field Project in Financial Management	Students will learn recent trends in Management Accounting.

Minor Subject [4 Credits]	Human Resources Management	Principles of Human Resource Management	Understand HR concepts, analyze strategy, address legal/ethical issues, develop management skills, apply theory, enhance communication, value diversity, grasp trends, foster leadership, and evaluate impact on engagement/performance.
	Financial Management	Fundamentals of Banking and Financial Services	Students will recognize need and importance of banking function and stock markets.
AEC [2 Credits]	Hindi	हिंदी भाषा- व्याकरण और लेखन कौशल	To increase the knowledge of students about Hindi language from Hindi Grammar Skill.
	Marathi	भाषा उपयोजन कौशल्ये	The students will learn language of advertisements & media, applying of concepts to practice in today's world.
	French	French	Basic Level French.
CC [2 Credits]	Co-Curricular Activities	EVS	EVS
		Cultural Activities	Cultural Activities
OE- Open Elective [2 Credits]	Economics	Understanding Share Market	The course aims to develop basic share trading skills among the students.
	History	A Journey through Asian Civilizations	The course explores the development of civilizations in Asia through an interdisciplinary study.
	English	Love and Betrayal	The course aims to address themes of eternal love and betrayal/loss of love in romantic relationships by bringing together in an eclectic collection the works of prominent authors, playwrights and poets.
	Hindi	प्रवासी साहित्य	Students will become familiar with foreign Hindi Women Writers and their Creative Writing.
	Psychology	Psychology of Health and Well-Being	The student will understand the causes, factors and prevention of illness and move on the path of well-being.
	Politics	Introduction to Political Campaigning	The course explores the aspects of electoral campaigning and the struggle for power.
	Education	Critical Thinking and Problem Solving	The course will help the students to understand and develop the ways to thinking critically and systematically solve the problem.

Marathi	व्यक्तिचित्र आणि उपयोजित मराठी	The course will help the students to understand Creative Writing & Text Editing skills.
Business Administration	Essentials of Event Management	The course helps to develop an understanding of the concepts and designing of events and event management.
Business Entrepreneurship	Startup Ecosystem	The course develops an understanding of Startups, Startup Revolution in India and the Startup Ecosystem.
Law	Consumer Protection Laws in India	Introduction to Consumer Laws in India with reference to Consumer Protection Act, 2019 and Food Safety and Standards Act, 2008.
Electronics	Fundamentals of Cyber Security	Fundamentals of Cyber Security and its role in today's era.
Mathematics	Advanced Quantitative Techniques	Develop learners' problem-solving skills and critical thinking abilities in the context of recruitment aptitude tests.
Computer Applications	Digital Marketing	Students will learn the concepts of Digital Marketing.

SYBBA SEM IV

Category	SEM IV	Title of the Course	Course Description
Major 1 Subject [4Credits]	Human Resources Management	Cross Culture In Human Resource Management	Explores managing diversity across global organizations. Topics include recruitment, training, and employee relations from a cross-cultural perspective. Students learn to adapt HR policies to diverse contexts, fostering collaboration and enhancing organizational performance globally.
	Financial Management	Introduction to Banking and Financial Services	The students will be able to comprehend growth and investment opportunities through banking, insurance companies and investment firms.
Major [4Credits]	Human Resources Management	Human Resource Integration Management	The course delves into the strategic alignment of HR practices with organizational goals, emphasizing techniques for effectively integrating HR functions across departments to optimize talent management, employee development, and organizational performance.
	Financial Management	Fundamentals of Financial Management	Students will understand role and importance of management of finance.
SEC Major Specific [2Credits]	Human Resources Management	Business Leadership Skills	The course cultivates the mindset and skills necessary to identify, assess, and pursue entrepreneurial opportunities, equipping individuals with the knowledge of business fundamentals and strategies to navigate the challenges of starting and growing a venture.
	Financial Management	Design Thinking	Teaches creative problem-solving through a human-centered approach. Students learn methods like brainstorming and prototyping to develop practical, feasible, and desirable solutions. Emphasis on empathy and collaboration prepares them for innovative roles in various industries.
CEP Major Specific [2Credits]	Human Resources Management	CEP in Human Resources Management	Able to understand the working of Micro Finance Institutions and Self-Help Groups.
	Financial Management	CEP in Finance	Will be engaged with the less privileged through Community Engagement Program.

Minor Subject [4Credits]	Human Resources Management	Human Resources Management & Practices	Student will learn the hr practices aimed at maximizing employee performance, satisfaction, and organizational effectiveness. Positive work culture to achieve strategic objectives.
	Financial Management	Basics of Finance	Students will understand importance of finance function.
AEC [2Credits]	Hindi	रचनात्मक लेखन	To develop basic skill of Reading, Writing, Speaking & Communication with creative writing skills.
	Marathi	कार्यक्रम संयोजन कौशल्ये	The students will learn concepts & language skills in events. Applying of concepts to practice anchoring, script writing for various events.
	French	French	Basic level French.
CC [2Credits]	Co-curricular Activities	EVS	EVS
		Cultural Activities	Cultural Activities
OE-Open Elective [2Credits]	Economics	Portfolio Management	The course aims to give students basic requirements of travel and tourism business and impart skills required.
	History	Echoes of Conflict: Understanding the World Wars	The course aims to help students understand the history of international relations through the world wars to enable them to relate it to the current world scenario.
	English	Identity and Heroism	The course aims to address themes of identity (gender based and others) and heroism by bringing together in an eclectic collection the works of prominent authors, playwrights and poets.
	Hindi	यात्रा साहित्य	To increase students knowledge regarding geographical, social & cultural subject through travel literature.
	Psychology	Psychology of Relationships	The learner will get an insight in knowing what close relationships, theoretical basis of relationships are and healing from dysfunctional relationships.
	Politics	Business and Politics	The course aims to explore relationship between business and politics.
	Education	Trends in Education	The paper will help the students to know and understand the new trends in education and help them to apply in their day to day learning activities.

OE- Open Elective [2Credits]	Marathi	ललित गद्य आणि उपयोजित मराठी	The course will help the students to understand creative writing & develop writing skills on social media platforms.
	Business Administration	Supply Chain Management	The course helps in developing an understanding of the concept, components, functions and trends in Supply Chain Management.
	Business Entrepreneurship	Business Models for Startups	The course helps in understanding Business Plans, Business Models and Risk Management in Business Models of Startups.
	Law	Laws relating to Wills, Nomination and Succession	Introduction to Inheritance Laws in India and rules for devolvment of Property.
	Electronics	Basics of Information Design	Introduction to technical communication and its role in the I.T. industry.
	Mathematics	Basics of Operations Research	Study of Operations Research Methods using mathematical modeling useful in industry, managerial decision-making and optimization.
	Computer Applications	Course in Analysis & Presentation of Data	To learn the basic & advance concepts of Excel & PowerPoint.

ST. MIRA'S COLLEGE FOR GIRLS, PUNE
SYBBA [CA] COURSE DESCRIPTION

SYBBA (CA) SEM III 2025-26		
CATEGORY	SEM III	Course Description
Major 1 Subject [4 Credits]	Data Structures	To understand the concepts of Data Structures & Algorithm.
	Lab Course Based on Data Structures	Hands on experience on theoretical concepts on Data Structures.
Major 2 Subject [4 Credits]	Introduction to PHP	To understand the Basic of Scripting Language using PHP.
	Lab Course Based on PHP	Hands on experience on Theoretical Concepts on PHP.
VSC - Major Specific [2 Credits]	Big Data	To learn the basic concepts of Data Analytics.
FP - Major Specific [2 Credits]	Field Project In Computer Application	Students will experience how to apply Theory & Practical Concepts by creating web application.
MINOR [4 Credits]	Principles of Software Engineering	To learn Basic Principles of Software Engineering.
AEC [2 Credits]	Choose any One	
Hindi	हिंदी भाषा- व्याकरण और लेखन कौशल	Students will become familiar with foreign Hindi Women Writers and their Creative Writing.
Marathi	भाषा उपयोजन कौशल्ये	The course will help the students to understand Creative Writing & Text Editing skills.
French	French	Basic Level French.
Co curricular Activities [2 Credits]	EVS	EVS
	Cultural Activities	Cultural Activities
OE-3 [2 Credits]	Choose any One	
Economics	Understanding Share Market	The course aims to develop basic share trading skills among the students.
History	A Journey through Asian Civilizations	The course explores the development of civilizations in Asia through an interdisciplinary study.
English	Love and Betrayal	The course aims to address themes of eternal love and betrayal/loss of love in romantic relationships by bringing together in an eclectic collection the works of prominent authors, playwrights and poets.

Hindi	प्रवासी साहित्य	Students will become familiar with foreign Hindi Women Writers and their Creative Writing.
Psychology	Psychology of Health and Well-Being	The student will understand the causes, factors and prevention of illness and move on the path of well-being.
Politics	Introduction to Political Campaigning	The course explores the aspects of electoral campaigning and the struggle for power.
Education	Critical Thinking and Problem Solving	The course will help the students to understand and develop the ways to thinking critically and systematically solve the problem.
Marathi	व्यक्तिचित्र आणि उपयोजित मराठी	The course will help the students to understand Creative Writing & Text Editing skills.
Electronics	Fundamentals of Cyber Security	Fundamentals of Cyber Security and its role in today's era.
Mathematics	Advanced Quantitative Techniques	Develop learners' problem-solving skills and critical thinking abilities in the context of recruitment aptitude tests.
Human Resource Management	Retail Management	Students delve into retail operations, consumer behavior, inventory management, visual merchandising, pricing strategies, retail marketing and customer service.
Business Administration	Essentials of Event Management	The course helps to develop an understanding of the concepts and designing of events and event management.
Business Entrepreneurship	Startup Ecosystem	The course develops an understanding of Startups, Startup Revolution in India and the Startup Ecosystem.
Law	Consumer Protection Laws in India	Introduction to Consumer Laws in India with reference to Consumer Protection Act, 2019 and Food Safety and Standards Act, 2008.

SYBBA (CA) SEM IV 2025-26

CATEGORY	SEM IV	Course Description
Major 1 Subject [Theory & Practical] [4 Credits]	Object Oriented Programming Using C++	To learn basic concepts of OOPs using C++
	Lab Course based on object oriented programming using C++	Hands on Experience on Theoretical Concepts of C++
Major 2 Subject [Theory & Practical] [4 Credits]	Advanced PHP	Students will learn advanced techniques of web designing.
	Lab Course Based on Advanced PHP	Hands on Experience on Theoretical Concepts of Web Designing.
SEC - Major Specific [2 Credits]	Computer Networking	To understand the components of computer network.
CEP - Major Specific [2 Credits]	Community Engagement Program in Computer Application	An initiative to bridge the digital /technological divide between the progressive world and communities in rural or poor urban areas.
Minor Subject [4 Credits]	Software Project Management	Students will learn the concepts of Project Management.
AEC [2 Credits]	Choose any One	
Hindi	रचनात्मक लेखन	To develop Basic Skill of Reading, Writing, Speaking & communication with creative writing skills.
Marathi	कार्यक्रम संयोजन कौशल्ये	The students will learn concepts & language skills in events. Applying of concepts to practice anchoring, script writing for various events.
French	French	Basic Level French.
Co curricular Activities [2 Credits]	EVS	EVS
	Cultural Activities	Cultural Activities
OE-4 [2 Credits]	Open Elective-4 Choose any One	
Economics	Portfolio Management	The course aims to give students basic requirements of travel and tourism business and impart skills required.
History	Echoes of Conflict: Understanding the World Wars	The course aims to help students understand the history of international relations through the world wars to enable them to relate it to the current world scenario.
English	Identity and Heroism	The course aims to address themes of identity (gender based and others) and heroism by bringing together in an eclectic collection the works of prominent authors, playwrights and poets.

Hindi	यात्रा साहित्य	To increase students' knowledge regarding geographical, social & cultural subject through travel literature.
Psychology	Psychology of Relationships	The learner will get an insight in knowing what close relationships, theoretical basis of relationships are and healing from dysfunctional relationships.
Politics	Business and Politics	The course aims to explore relationship between business and politics.
Education	Trends in Education	The paper will help the students to know and understand the new trends in education and help them to apply in their day to day learning activities.
Marathi	ललित गद्य आणि उपयोजित मराठी	The course will help the students to understand creative writing & develop writing skills on social media platforms.
Electronics	Basics of Information Design	Introduction to technical communication and its role in the I.T. industry.
Mathematics	Basics of Operations Research	Study of Operations research methods using mathematical modeling useful in industry, managerial decision making and optimization.
Human Resource Management	Corporate Communication and Public Relations	Corporate communication and public relations involve managing relationships with different public groups through informing, persuading, dialogue and negotiation.
Business Administration	Supply Chain Management	The course helps in developing an understanding of the concept, components, functions and trends in Supply Chain Management.
Business Entrepreneurship	Business Models for Startups	The course helps in understanding Business Plans , Business Models and Risk Management in Business Models of Startups.
Law	Laws relating to Wills, Nomination and Succession	Introduction to Inheritance Laws in India and rules for devolvement of Property.

SYBSC (CS) SEM III		
CATEGORY	SEM III	Course Description
Major 1 Subject [Theory & Practical] [4 Credits]	Data Structures Using C	It is a foundational course that explores efficient methods to organize, store, and manipulate data using various structures like arrays, linked lists, trees, and graphs. It also covers algorithmic techniques, including searching, sorting, and optimization, to solve computational problems effectively.
	Database Management System	covers fundamental concepts like data modeling, database design, SQL, and various database systems, preparing students for careers in data management and analysis.
	Computer Science Practical – Data Structures and DBMS	This practical course provides hands-on experience in implementing data structures and database concepts
Minor - Minor 1(T)	Numerical Techniques	This course will enable students to solve problems based on non linear polynomials, linear systems , interpolation, integration and ordinary differential equations using Numerical techniques. It will help to analyse the methods with respect to speed and accuracy consequently understanding errors and approximations in answers.
MINOR 1(P)	Mathematics Practical - Numerical Techniques	This course will enable students to solve problems based on non linear polynomials, linear systems , interpolation, integration and ordinary differential equations using Python. It will help to find as many as possible number of approximations and analyze the methods.
Minor 2(T)	Basics of Embedded System	The course provides foundational knowledge of designing, programming, and integrating hardware and software in microcontroller-based systems.

OE	Choose any One	
Electronics	Fundamentals of Cyber Security	Fundamentals of Cyber Security and its role in today's era
Mathematics	Advanced Quantitative Techniques	Develop learners' problem-solving skills and critical thinking abilities in the context of recruitment aptitude tests.
	एआय, इंटरनेट ऑफ थिंग्स आणि एमएस ऍक्सेस	
VSC- Major Specific	Software Engineering Concepts	approach to designing, developing, testing, and maintaining high-quality software systems. It encompasses a wide range of principles, methodologies, and tools to ensure software meets requirements.
AEC		
Hindi	हिंदी भाषा- व्याकरण और लेखन कौशल	To increase the knowledge of students about Hindi language from Hindi Grammar Skill.
Marathi	भाषा उपयोजन कौशल्ये	The Students will learn language of advertisements & media, applying of concepts to practice in today's world.
FP	Field Project - Computer Science	Applying theoretical knowledge to real-world problems. Students work on practical projects that address challenges faced by organizations or communities, gaining valuable hands-on experience and developing crucial skills like problem-solving, teamwork, and communication.
Co curricular Activities [2 Credits]	EVS	EVS
	A Course in Environmental Science and Awareness	Cultural Activities
IKS-Major Specific		
BSc Computer Science	Indian Knowledge Systems in Computing	This interdisciplinary field explores the historical contributions of ancient Indian scholars to computing concepts, including algorithms, logic, and data representation

SYBSC (CS) SEM IV		
CATEGORY	SEM IV	Course Description
Major 1 Subject [Theory & Practical] [4 Credits]	Python Programming	This course explores basic python programming concepts. It helps students to develop programming skills.
	Relational Database Management and NoSQL	cover fundamental principles of organizing and managing data effectively. providing a strong foundation for working with data in various applications.
	Relational Database Management and NoSQL	cover fundamental principles of organizing and managing data effectively. providing a strong foundation for working with data in various applications.
	Computer Science Practical – Python	Provides hands-on experience in Python programming. Students learn to write, execute, and debug Python code, implement data structures and algorithms, and develop practical applications using Python libraries and frameworks
Minor - Minor 1(T)	Computational Geometry and Algorithms	This paper includes mathematical part of computer Computer Graphics. This paper includes transformation ,projection, Bezier curve which is used by engineering drawing and CAD and CAM software and algorithms related to that.
MINOR 1(P)	Mathematics Practical - Computational Geometry	In this paper actual transforamtion of point and 2D objects and effects of transformation can be seen viually, that will develop visualing skills and programming skills in Python.
Minor 2(T)	Smart Wireless technology	The course explores advanced wireless communication systems and their applications in smart devices, IoT, and networked ecosystems.
MINOR2(P)	Practical in Smart Wireless Technology	Practical in Smart Wireless Technology

OE	Choose any One	
Electronics	Basics of Information Design	Introduction to technical communication and its role IT industry
Mathematics	Basics of Operations Research	Study of Operations research methods using mathematical modelling useful in industry, managerial decision making and optimization.
	□ □ □ □ □ □ □ □ □ □	
VSC- Major Specific	HTML Essentials and Web Design with Bootstrap	This practical course focuses on web page designing with the help of bootstrap.
SEC	Querying Methods in Databases	This skilled based practical course will offer procedural SQL querying techniques and document based database (NoSQL) queries using MongoDB
CEP	Computer Science-CEP	
AEC		
Hindi	□ □ □ □ □ □ □ □ □ □	To develop basic skill of reading, writing, speaking & communication with creative writing skills.
Marathi	□ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □	The students will learn concepts & language skills in events. Applying of concepts to practice anchoring, script writing for various events.
FP	Field Project - Computer Science	Applying theoretical knowledge to real-world problems. Students work on practical projects that address challenges faced by organizations or communities, gaining valuable hands-on experience and developing crucial skills like problem-solving, teamwork, and communication.
Co curricular Activities [2 Credits]	EVS	EVS
	A Course in Environmental Science and Awareness	Cultural Activities
	Environmental Pollution and Sustainability	Co curricular activity assigned by college list.

MAJOR - ECONOMICS

TYBA

Sr. No.	Category	Title of the Course	SEM	Description
1)	Major 3 - Economics	Global Trade Dynamics	V	This course will introduce the learners to various theoretical approaches to global trade, and contemporary issues like Terms of Trade, Trade policies and Global Trade Regulatory framework. It also covers current issues like Trade wars.
		Dynamics of Global Finance	VI	The course will cover theories and contemporary structures of International Finance in global context as well as from Indian perspective
2)	Major 4 - Economics	Approaches and Issues in Economic Development	V	The course covers knowledge areas of theories of growth and development, determinants and challenges and country experiences
		Economics of Sustainability	VI	This course will cover the sustainability aspects of development covering social economic and environment sustainability using the framework of SDGs along with new concepts and theories that have emerged in the field
3)	Major + 2 - Economics	Economic History of India	V	This course will entail an understanding of Indian Economy and Indian economic thought before and during British period and early years of independent India
		Health Economics	VI	This course introduces theories and covers empirical aspects of Health economics
4)	Major Elective - Economics	Financial Planning	V	The course introduces students to the financial education and the financial planning
		Investment and Portfolio Management	VI	The course will introduce the learners to the various avenues of investment and portfolio management

5)	Minor (different than Major)	Title of the Course	SEM	Course Description
	Economics	Money and Banking in India	V	This course covers the theoretical and practical aspects of Money and Banking system in India
		Indian Public Finance	VI	The course offers an insight into the government's finances including taxation, government and its effect of economy and society
6)	VSC - Major Specific	Title of the Course	SEM	Course Description
	Economics	Retail Economics	V	The course will cover applications of various economic concepts like market structures, consumer behavior, demand theory as well as pricing decisions and retail industry trends and economic policies in India
		Foundation Course in Econometrics		This course helps the learners understand the basic principles and tools of econometrics and their application in analyzing economic data.
7)	FP/CEP - (Major Specific - only for FP)	Title of the Course	SEM	Course Description
	Economics	CEP- Economics	V	
8)	OJT	Title of the Course	SEM	Course Description
	Economics	OJT- Economics	VI	This course will provide an opportunity to the students to build on their theoretical knowledge and apply it to the real life situations; In the process learning the time management; interpersonal skills and developing a broader perspective

MAJOR - ENGLISH

TYBA

Sr. No.	Category	Title of the Course	SEM	Course Description
1)	Major 3 - English	Introduction to Language and Linguistics	V	This course explores key concepts in language and linguistics, focusing on phonology, morphology, and the scientific study of language. The course also covers the characteristics, functions, and variations of English to better understand word structure and sound systems.
		Language in Action: An Analysis of English Today	VI	This course examines the global reach, varieties, and sociolinguistic contexts of English. Students will analyze syntax, stylistics, and language variations, applying their knowledge through assignments and research.
2)	Major 4 - English	The Art of Criticism: Voices through Time	V	The course introduces students to different literary periods and literary critics ranging from Plato to Eliot in order to aid their critical skills in appreciation and evaluation of literature.
		Threads of Thought: Literary Theory Unravelling	VI	The course introduces students to prominent literary theories starting from Structuralism and Deconstruction to Marxism, Feminism and Postmodernism among others. The theories are studied in coordination with literary pieces to aid understanding and improve analytical skills
3)	Major + 2 - English	Language of Cinema	V	The course will introduce students to the field of film studies and equip them with the foundational basics to conduct independent analyses of films as works of art and cultural products.
		Understanding Media, Language, and Society	VI	The course will introduce students to the foundational basics of media studies and help them critically analyze different forms of media with respect to the cultural context.

4)	Major Elective - English	Myth and Literature	V	The course explores different forms of literature dealing with myths and identity formation. The students critically evaluate texts in light of economic disparity and wars.
		Literature: Listening to the Margin	VI	The course explores texts dealing with issues such as minorities, human rights and discrimination. The students are also introduced to emerging forms such as the graphic novel.
5)	Minor (different than Major)	Title of the Course	SEM	Course Description
	English	Literature: Voices, Verses, and Visions	V	This course examines women's poetry, innovative short stories, and Orwell's Animal Farm, highlighting personal, social, and political themes. Students explore narrative techniques, cultural contexts, and literary innovation through authors such as Judith Wright, Carol Ann Duffy, E. M. Forster, and Ray Bradbury.
		Literature: Life, Laughter and Legacy	VI	This course explores poems, satirical works, and drama by authors such as Hardy, Heaney, Achebe, Thurber, Swift, and Karnad, revealing cultural, ethical, and historical insights. Through these texts, students gain critical perspectives on literature and how it reflects and shapes diverse human experiences.
6)	VSC - Major Specific - English	Title of the Course	SEM	Course Description
	English	Introduction to Corporate Training	V	The course aims to train students to become corporate trainers by equipping them with foundational skills to conduct corporate trainings.

7)	FP/CEP - (Major Specific - only for FP) - English	Title of the Course	SEM	Course Description
	English	English Field Project- Content Writing and Editing	V	The English Field Project focuses on developing advanced skills in content writing, editing, and creative expression. Students learn to craft compelling narratives, refine language, and edit work for clarity and impact.
8)	OJT - English	Title of the Course	SEM	Course Description
	English	OJT- English	VI	This course provides hands-on experience and real-world skills through practical, on-the-job training. Learners will gain valuable insights and expertise in their domain related jobs.

MAJOR - SOCIOLOGY

TYBA

Sr. No.	Category	Title of the Course	SEM	Course Description
1)	Major 3 - Sociology	Urban Sociology: New Trends and Structure	V	This course covers basic concepts to understand urban society, and new trends and complexities of urbanization
		Doing Sociology through Films	VI	This course will help students to understand and analyse social concepts through films
2)	Major 4 - Sociology	Sociology of Development and Social Change	V	This course examines the changing discourse of development. It highlights the need to understand interlinkages between development and social inequalities.
		Globalization: Sociological Approach	VI	The course examines processes and structures of global society. It discusses social issues of global concern.
3)	Major + 2 - Sociology	Public Sociology	V	The course will focus on the role of sociology in advocacy and public policy. It focuses on looking at personal problems as public issues.

		Rural Society: Issues and Change	VI	The course will help in understanding the structure and dynamics of rural society. It discusses issues and challenges related to rural development.
4)	Major Elective - Sociology	Sociology of Ageing and Gerontological Care	V	The course introduces sociological approach to understand the ageing as a social issue.
		Food and Society	VI	This course helps to understand food as a sociological issue by examining the systems of production and consumption of food.
5)	Minor (different than Major)	Title of the Course	SEM	Course Description
	Sociology	Media and Society	V	This course helps in understanding the role of media and technology in shaping human society. It examines the nature of today's mediated society.
		Sociological Approach to Information Society	VI	The course introduces sociological concepts to understand the new mediated society. It examines challenges and risks posed by increasing use of information technology
6)	VSC - Major Specific - Sociology	Title of the Course	SEM	Course Description
	Sociology	Social Audit	V	The course introduces concept, procedure and tools of social audit
7)	FP/CEP - (Major Specific - only for FP) - Sociology	Title of the Course	SEM	Course Description
	Sociology	Sociology Field Project	V	The field project will help students in applying conceptual knowledge to understand social issues and offer practical insights
8)	OJT - Sociology	Title of the Course	SEM	Course Description
	Sociology	OJT- Sociology	VI	This course will provide training and hands-on experience of applied skills.

MAJOR - PSYCHOLOGY

TYBA

Sr. No.	Category	Title of the Course	SEM	Course Description
1)	Major 3 - Psychology	Understanding Counseling-Processes and Theories	V	This course explores the fundamentals of counseling processes and theories including the core concepts and therapeutic approaches.
		Industrial and Organizational Psychology	VI	This course introduces the principles and practices of Industrial and Organizational Psychology, focusing on employee behavior, performance, and workplace dynamics.
2)	Major 4 - Psychology	Psychometric Testing	V	The course explores the principles of administration and interpretation of standardized psychological tests.
		Experiments in Psychology	VI	The course explores the principles of administration and interpretation of scientific psychological experiments.
3)	Major + 2 - Psychology	The Practice of Counseling-Essential Skills	V	The course introduces the applied principles of counseling, focusing on ethics, cultural competence, essential listening skills.
		Design Thinking in Psychology	VI	This course will help the learners to understand the basics principals of design thinking. It will explore the application of design thinking principles within Industrial/Organizational psychology
4)	Major Elective - Psychology	Positive Psychology: Life Above Zero	V	The course introduces the principles and applications of positive psychology, focusing on well-being, resilience and strategies to enhance individual and community flourishing.

		Psychology of Human Behavior in Society	VI	The course will help the learners to summarize the foundational concepts of social psychology, providing insights into the development and dynamics of social behavior and interactions.
5)	Minor (different than Major)	Title of the Course	SEM	Course Description
	Psychology	Workplace Psychology	V	This course examines the role of psychology in workplace settings, focusing on employee behavior, motivation, and organizational culture. Participants will learn strategies to enhance productivity, wellbeing, and team dynamics.
		Fundamentals of Adjustment Psychology	VI	The students will examine various theoretical models and practical approaches to understanding how individuals adjust to changes in their environment, self-perception, relationships and career
6)	VSC - Major Specific - Psychology	Title of the Course	SEM	Course Description
	Psychology	Applied Statistics in Psychology	V	The course explores statistical methods and techniques for analyzing, interpreting, and presenting data in psychological research. The learners will get a hands-on experience with utilizing statistical software
7)	FP/CEP - (Major Specific - only for FP) - Psychology	Title of the Course	SEM	Course Description
	Psychology	Psychology Field Project-Research in Action	V	The course aims to equip students with skills to design, conduct, and critically evaluate psychological research using qualitative and quantitative methods

8)	OJT - Psychology	Title of the Course	SEM	Course Description
	Psychology	OJT- Psychology	VI	This course provides hands-on experience and real-world skills through practical, on-the-job training. Learners will gain valuable insights and expertise in their domain related jobs.

MINOR - History, Politics, Education

5)	Minor (different than Major)	Title of the Course	SEM	Course Description
		The Heritage and Culture of India	V	This course will cover topics on India's vibrant cultural landscape, from ancient rituals to understand the diversity our culture holds.
	History	The Legacy of Indian Culture and Heritage	VI	This course explores the rich and diverse traditions that have shaped India's identity. It will introduce the students to India's historical, artistic, contributions, highlighting their lasting influence

5)	Minor (different than Major)	Title of the Course	SEM	Course Description
		Trends in Governance and Public Policy	V	This course covers emerging trends in administration, including digital governance, decentralization, and policy design. It also addresses globalization's impact, policy challenges, and ethics in governance.
	Politics	Foundations of Indian Political Thought	VI	This course examines the foundations of Indian political thought, focusing on governance, social reforms, justice, equality, and socialism.

5)	Education	Pedagogy of Teaching	V	This course covers the methods, models and techniques of teaching-learning process
		Assessments and Evaluation in Education	VI	This course covers the methods, tools of evaluation in teaching learning process

MAJOR - BE (Business Entrepreneurship)
2025-26

TYBCOM

		Title of the Course	SEM	Course Description
1	Major 3 - BE	Enterprise Building and Management	V	This course focuses on the dimensions of enterprise building and management viz. Innovation, Finance, Marketing, Revenue models and Networking
		Sustaining Entrepreneurial Ventures	VI	This course explores the various government initiatives, support to entrepreneurs and the role of AI in Businesses
2	Major 4 - BE	People Centric Management	V	This course covers the fundamental aspects and recent developments in OB, personality, EI and conflict management
		Research Methodology for Business Entrepreneurship	VI	This course covers essential research methods in business entrepreneurship,. Students will learn to design, conduct, and analyze research, covering topics such as problem formulation, literature review, data collection, sampling, survey design, and statistical analysis.
3	Major +2 - BE	Financial Accounting for Business Entities	V	This course introduces the types of Business Entities and its financial statement with special focus on preparation of Company Final Accounts

		Financial Statement Analysis	VI	This course intends to introduce the Fund Flow and Cash Flow statements along with analysis and Interpretation of Ratio Analysis
4	Major Elective	Auditing for Business Entities	V	This course introduces the various types of Audits for Business entities and trends of Auditing to students
